## Work experience

### Software Engineer Intern

DBS Bank, 1st April 2025 - 31st March 2026

- Key Responsibilities & Achievements:
  - Full-Stack Migration & DevOps: Spearheaded the database and backend migration of the Martech Request Portal, transitioning from MongoDB to MariaDB. Developed Java Spring Boot APIs to replace direct database calls and automated deployment using Jenkins pipelines on OpenShift.
- Performance Optimization: Optimized application performance using data structures, significantly enhancing the responsiveness of high-data spreadsheet modules.
- A/B Testing & Data Analytics: Led a full-page revamp experiment for the TSP platform. Developed responsive UI using HTML/CSS/JS and integrated Adobe Target and Adobe Analytics to track user engagement and drive data-driven design decisions.
- Database Management: Managed schema changes and version control using Liquibase scripts for MariaDB, ensuring consistent and reproducible database deployments across environments.
- Experimental UI Development: Executed multiple front-end experiments, to improve user onboarding and click-through rates.

## Education & Learning

### National University Of Singapore

undergraduate in Computer Science

expected 2028

### Nanyang Polytechnic

Diploma In Information Technology with Merit

2023-2026

- Cumulative GPA: 3.91

## Technical Skills

**Languages:** Java, Python, JavaScript, TypeScript, Kotlin, C#, SQL, HTML5, CSS

**Frameworks & Libraries:** Spring Boot, React.js, Next.js, Node.js, jQuery, Flask, Entity Framework Core

**Databases:** MariaDB, MongoDB, Microsoft SQL Server, MySQL

**DevOps & Tools:** Jenkins, OpenShift, Git, Liquibase, Adobe Target, Adobe Analytics

**Methodologies:** SDLC, A/B Testing, UX Design, Full-Stack Development

**Software Design Certifications:** Google UX Design Specialization

## Achievements

- WorldSkills Singapore 2025 — Silver Medalist
- Certificate of Appreciation — 14th WorldSkills ASEAN
- Ngee Ann Kongsi Tertiary Scholarship
